Assignment No	7
Title	**JSP Scripting Elements**
Objective	**1)Current Data & Time** **2)Greeting Based On Hour** **3) Multiplication Table the value is input from user**
Roll No	**MCA2649**

1)Current Data & Time

Source Code:-

```
<html>
<body>
	Current Data & Time
	<%= new java.util.Date() %>
</body>
</html>
```

Output:-

2)Greeting Based On Hour

Source Code:-

```
<%!
    int hour;
%>

<HTML>
    <BODY>
            <%
            //get current hour
            hour = java.time.LocalTime.now().getHour();
                  if(hour <12)
                  {
                        out.println("Good Morning!!");
                  }
                  else if(hour >= 12 && hour < 16)
                  {
                        out.println("Good Afernoon!!");
                  }
                  else
                  {
                        out.println("Good Evening!!");
                  }

            %>
    </BODY>
</HTML>
```

Output:-

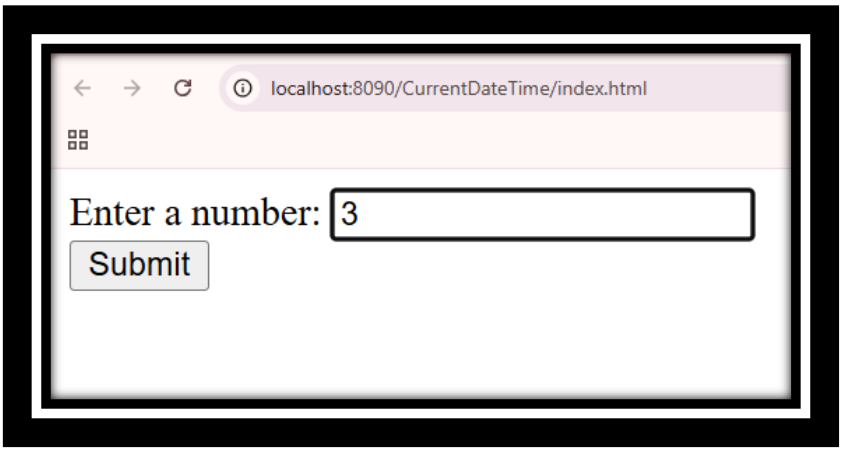

3) Multiplication Table the value is input from user

Source Code:-

i)index.html

```
<!DOCTYPE html>
<html>
<head>
<meta charset="ISO-8859-1">
<title>Insert title here</title>
</head>
<body>
<form action="MultTable.jsp" method="GET">
	Enter a number: <input type="text" name="num">
	<br>
	<input type="submit" name="sub" value="Submit">
</form>
</body>
</html>
```

Output:-

ii)MuilTable.jsp

```
<HTML>
<BODY>
	<%! int num; %>
	<%
		//fetch the value of num from index.html
		num=Integer.parseInt(request.getParameter("num"));
		out.println("Multiplication Table of:" + num +"<BR>");
		for(int i=1;i<=10;i++)
		{
			out.println(num+"*"+i+"="+(num*i)+"<BR>");
```

```
            }
        %>
</BODY>
</HTML>
```

Output:-
